Outlook & Valuation

JSW Energy's growth pipeline of 30 GW by 2030 and 40 GWh of energy storage remains intact, supported by strong renewable capacity additions and the ramp-up of the Mahanadi thermal asset. However, rising leverage (Net Debt/EBITDA at 4.8x) and a YoY decline in reported PAT warrant monitoring as the company funds its expansion. We rate the stock ACCUMULATE with a target price of Rs 620.
